## Best free amp blogger template

In this article we have listed some of the best amp templates blogger for you to download each template click on the download button. The amplifier is called accelerated mobile pages. Amp helps your blog and site load quickly in search results, fast indexing, and the best position in search results. At this time Blogger does not officially support amp. There are so many developers who are trying to make amp blogger templates platforms. All amp Blogger templates listed below are the same and work well. These amp blogger templates increase the loading time of your blog and help you back up the best search engine rankings. Amp HTML template is similar to a normal HTML page, but there is little difference between them. AMP pages stored on another server that loads quickly in mobile phones because the amp pages are less in size and Java scripts, so they best in search results. To test each amp Blogger template and link just visit this link amplifier test. By visiting this link, you just need to fill in the URL of the desired template and page and click on the test button this will show you that this page is valid or not. The Search Console can also help you know that your pages are valid or not To check the amplifier page and site, visit this link. Amp validator has accelerated a demonstration on mobile pages. Click on the demo button and see the demo of the desired template.
